### **DETAILED ACTION**

1. This action is responsive to communications: Amendment filed 04/21/2005.
2. Claims 25-45 are pending in the case.

#### ***Response to Amendment***

3. The amendment filed 04/21/2005 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material, which is not supported by the original disclosure, is as follows: All the amendments to claims 43-45 and the specification add telephones to list of devices. Applicant alleges that this is not new matter based on the picture of the telephone that appears in Figs. 1 and 2. However, there is no disclosure in the original specification of how this is accomplished and therefore neither the amended claims nor specification is supported by the original disclosure. By example, on p. 5, there is some disclosure of how the other document acquisition engines work.

Applicant is required to cancel the new matter in the reply to this Office Action.

#### ***Claim Rejections - 35 USC § 112***

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 43-45 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant

Art Unit: 2179

art that the inventor(s), at the time the application was filed, had possession of the claimed invention. See objection above.

***Claim Rejections - 35 USC § 103***

6. Claims 43 is rejected under 35 U.S.C. 103(a) as being unpatentable over Raggett "HTML 4.01 Specification, W3C Recommendation" 12/24/1999 found at <http://www.w3.org/TR/1999/REC-html401-19991224>, and further in view of Bayeh et al. (USPN 6012098, filed on 2/23/1998).

Regarding independent claim(s) 43, once Applicant removes the newly added language directed to the telephone the remaining language of the claim remains rejected. Raggett teaches mapping a page of an input document into a plurality of predetermined presentation zones (§6.1). Raggett teaches that they are reconstructed in a presentation option, or format as called for (§16.1, frame layout). Inherently they must be parsed into the their respective zones. Raggett does not explicitly teach document acquisition engines. Bayeh teaches engines that collect document presentation data from document generators (col. 11, ll. 23-60), converts data into a single format, envelop in data streams and send to parsing engines (col. 12, ll. 8-12). Bayeh teaches a repository (Fig. 3, 88). It would have been obvious to one of ordinary skill in the art at the time of the invention to combine Bayeh and Raggett in order to take advantage of streams processes data as it being created (col. 12, ll. 11-12).

***Comments***

Claims 44-45 are new dependent claims directed to the new subject matter as discussed above. As such these claims have not been considered with regard to a prior art rejection.

***Allowable Subject Matter***

7. Claims 25-42 allowed.

***Conclusion***

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

9. This action is a **final rejection** and is intended to close the prosecution of this application. Applicant's reply under 37 CFR 1.113 to this action is limited either to an appeal to the Board of Patent Appeals and Interferences or to an amendment complying with the requirements set forth below.

If applicant should desire to appeal any rejection made by the examiner, a Notice of Appeal must be filed within the period for reply identifying the rejected claim or claims appealed. The Notice of Appeal must be accompanied by the required appeal fee.

Art Unit: 2179

If applicant should desire to file an amendment, entry of a proposed amendment after final rejection cannot be made as a matter of right unless it merely cancels claims or complies with a formal requirement made earlier. Amendments touching the merits of the application which otherwise might not be proper may be admitted upon a showing a good and sufficient reasons why they are necessary and why they were not presented earlier. **An amendment canceling claims 43-45 will result in a Allowance.**

A reply under 37 CFR 1.113 to a final rejection must include the appeal from, or cancellation of, each rejected claim. **An amendment canceling claims 43-45 will result in an Allowance.** The filing of an amendment after final rejection, whether or not it is entered, does not stop the running of the statutory period for reply to the final rejection unless the examiner holds the claims to be in condition for allowance. Accordingly, if a Notice of Appeal has not been filed properly within the period for reply, or any extension of this period obtained under either 37 CFR 1.136(a) or (b), the application will become abandoned.

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Adam M Queler whose telephone number is (571) 272-4140.

The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Heather R Herndon can be reached on (571) 272-4136. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
